● AMARILLO ● CANTALOUPE ● CHARENTAIS ● GALIA ● GALIA LARGA VIDA ● IVORY GAYA ● ORANGE CANDY ● PIEL DE SAPO ● SUNUP

Firmeza: medidas de firmeza de esa semana, escala 1–5; la barra va del mínimo al máximo y la marca es la media. «Medidas» cuenta solo medidas de firmeza. Se excluyen 5 medidas fuera de escala (23, 27, 33, 41, 45: falta la coma).

Azúcar: el volcado no trae fecha para el azúcar: se da el de toda la temporada de esas fincas y variedad. Rangos calculados con los valores de °Brix uno a uno (el 12 exacto va en ≥12). No se da el nº de muestras de azúcar porque el volcado no lo trae.

Filas de tipo (sombreadas): totales del tipo esa semana. El detalle por finca está en el Excel «informe_escandallo_melon_2026.xlsx».
